

Literature Search Request

This service is free of charge. References can be emailed to you or printed and sent to your department. If you are on a course, and the search is part of your studies then you will be required to complete the search yourself. However you may book in for a one to one training session, tailored to your topic.

Please provide as much information as possible. For example a request for a search on preterm labour is too general. A more focussed request would be the effects of calcium channel blockers for inhibiting preterm labour. Write out acronyms in full if necessary.

Your Name:

Department/ward:

Job title:

Contact email if you want references emailed to you:

Telephone extension/mobile:

Search Topic:		
	Keywords or phrases	Alternative keywords if any
Main concept eg who is the patient or what is the condition?		
Any interventions?		
Any comparisons?		
Any outcomes?		
Any other information. Eg year ranges, age groups, type of publication, authors etc		

If your search is nothing to do with a patient or condition still complete the title of your topic underlining the main keywords and specify any alternative keywords and acronyms in spaces provided. Requests can also be made by telephone/email to:
